

Appendix D : Pricing Schedule**Agreement between the New York State Office of General Services and
RCI Technologies, Inc.
for Project Based Information Technology Consulting Services****Contract Number: PB145AA****Table of Contents****Sheet #1: Pricing Schedule****Authorized Users please note the following:**

A competitive Mini-Bid is required for every transaction under this Centralized Contract.
(Section 5.1 of the Contract)

The Contractor acknowledges that any mini-bid under this Centralized Contract which includes pricing in excess of the "maximum Not-To-Exceed price" shall be rejected by the Authorized User.
(Sections 4.4 and 6.9 of the Contract)

Price increases will only apply to the OGS Centralized Contracts and shall not be applied retroactively to Authorized User Agreements or any Mini-bids already submitted to an Authorized User.
(Section 4.22 of the Contract)

When provided for in the Mini-Bid and resultant Authorized User Agreement, an Authorized User may reimburse travel expenses. All rules and regulations associated with this travel can be found at <http://osc.state.ny.us/agencies/travel/travel.htm>. In no case will any travel reimbursement be paid that exceeds these rates. All travel will be paid only as part of a deliverable specified within the Authorized User Agreement and must be billed with that associated Invoice with receipts attached.
(Section 6.10 of the Contract)

PRICING SCHEDULE

CONTRACTOR NAME:	RCI Technologies, Inc.
FEDERAL ID:	222485060
NYS VENDOR ID:	1000033708
CONTRACT NUMBER:	PB145AA
DATE PRICELIST APPROVED BY OGS:	10/28/2016

Item Number	SKU	Job Title	Job Description	Minimum Education / Certification Level	Minimum Years of Experience	NYS Contract Price (Not to Exceed Hourly Rate, Exclusive of Travel)
1	Admin	Administrator	Responsibility for the data modeling, creation, implementation, performance, capacity planning, backup/recovery, upgrade, maintenance and support for a large, mission-critical 24x7 database servers. Experience in creating, maintaining and tuning large, secure, mission-critical RDBMS (Oracle, Sybase, or MS SQL Server). Very strong in Transact SQL programming. Monitors and optimizes the performance of database, ability to write and maintain complex UNIX scripts, develops disaster recovery and fail over plans. Assist the Database Developers regarding writing Stored procedures, views, schemas, indexing and maintaining scripts for further use.	<i>MS Or BS</i>	5	\$99.00
2	Spc1	Computer Specialist - 1	Develop and prepare documents for the general design of solutions that meet system and security requirements, including the selection of alternative approaches. Develop specifications for databases, communication systems, hardware, network, security, storage and software configurations. Develop structured diagrams for the specifications of databases, communication systems, computer or storage area networks, security or network programs. Develop, compile, maintain and document configurations of the following: databases, servers, computers, security and network monitor systems, packaged programs, macros, utilities, and communication systems. Develops operational and installation procedures for communication systems, hardware, network, security, storage and software. Develops guidelines and upgrade techniques of new operational procedures for the support of databases, hardware systems, operating systems software, network systems software, security and client server systems.	<i>BS or Equivalent</i>	2	\$50.00
3	Spc2	Computer Specialist - Tester	Develop and lead test strategy creation and implementation for large projects. Provide technical leadership/supervision of the creation, design, execution, documentation, and maintenance of the test plans/procedures and expected results consistent with change control procedures for automated and manual testing. Lead analysis of test results and communication of findings/recommendations to project team members for defect issue and problem resolution. Execute Manual and Automated Test Cases. Communicate with QA management on project status, risk analysis and release ability. Lead Root Cause analysis and recommend corrective actions in upstream processes and Code review process to improve defect containment. Provide progress/status reports to test management on larger projects and consolidate reports as necessary. Promote product development lifecycle process (PDLC) . Working knowledge of test tools (WinRunner, LoadRunner, Silk, Rational), automation and platform technologies and Test traceability matrices.	<i>MS Or BS</i>	4	\$83.00
4	DataA	Data Analyst	Executing data conversions, analysis, programming, and reporting from the perspective of Stored Procedures, User Defined Functions and Complex SQL. Ability to write performance optimized SQL sub-queries and derived queries. Ability to coordinate the testing and implementation of technology solutions (applications, data warehousing, business intelligence, etc.) . Experience with data modeling tools, Erwin preferred Data sourcing & data mapping skills. Expert in managing meta data. Sound knowledge of ETL.	<i>MS Or BS</i>	2	\$87.60

5	ProjL	Project Leader	Work closely with business partners, project managers, third-party vendors, and developers to review business requirements. Provide work estimates based on business requirements analysis. Partner with project management to establish deadlines for completion of projects. Provide formal project communication to management. Work with a team of developers to implement projects. Provide technical guidance and direction to developers. Ensure the architectural review of a technical or business solution is performed and documented according to Enterprise-Wide Technical Architect standards; provide estimates of time, resources and costs. Establishes scope, identifies team, and initiates change control as project progresses. Addresses issues and mitigates risks, communicates status to business sponsor, IT management, and other projects that are impacted by the project. Relies on experience and judgment to plan and accomplish goals. Collects, reviews, analyzes, evaluates and prioritizes business system and user requirements from business, and works with technical lead and developers on translating requirements to system impacts at low level.	MS Or BS	6	\$115.45
6	ProjM	Project Manager	Minimum Manage the implementation of the software system that is selected. Provide presentations to Sr. Management. Excellent time management. Driven and Self-motivated. Good Communication and inter-personal skills. Anticipates issues and develops mitigating action plans. Responsible for project Status Reporting, Issue Escalation and Resolution, and Schedule Management. Assimilates project team members and ensures they get up to speed Ensures quality of deliverables. Communicates and develops implementation plans both internally and externally as part of the Project Cycle.	MS Or BS	6	\$95.00
7	SpctestDev	Specialist - Load Test Developer	Develop and prepare documents for the general design of solutions that meet system and security requirements, including the selection of alternative approaches. Develop specifications for databases, communication systems, hardware, network, security, storage and software configurations. Develop structured diagrams for the specifications of databases, communication systems, computer or storage area networks, security or network programs. Develop, compile, maintain and document configurations of the following: databases, servers, computers, security and network monitor systems, packaged programs, macros, utilities, and communication systems. Develops operational and installation procedures for communication systems, hardware, network, security, storage and software. Develops guidelines and upgrade techniques of new operational procedures for the support of databases, hardware systems, operating systems software, network systems software, security and client server systems.	MS Or BS	5	\$95.00
8	Spc3	Specialist III	Maintain the health, viability and integrity of the computer servers which comprise the entire Enterprise Infrastructure that supports mission critical applications. Install, configure, and maintain, UNIX / AIX / Linux Operating Systems and the server platforms on which they reside which ranges from the low end v20 to the high end Solaris 25K and the IBM P770. Troubleshoot, diagnose, resolve, recover, and restore failed servers, storage, switches, disk & tape media and data. Develop, compile, maintain and document configurations of the following: databases, servers, computers, security and network monitor systems, packaged programs, macros, utilities, and communication systems. Develop operational and installation procedures for communication systems, hardware, network, security, storage and software.	MS Or BS	6	\$100.00
9	SysAdmin	Systems Administrator	Responsibility for the data modeling, creation, implementation, performance, capacity planning, backup/recovery, upgrade, maintenance and support for a large, mission-critical 24x7 database servers. Experience in creating, maintaining and tuning large, secure, mission-critical RDBMS (Oracle, Sybase, or MS SQL Server). Very strong in Transact SQL programming. Monitors and optimizes the performance of database, ability to write and maintain complex UNIX scripts, develops disaster recovery and fail over plans. Assist the Database Developers regarding writing Stored procedures, views, schemas, indexing and maintaining scripts for further use.	MS Or BS	5	\$99.00
10	TeamL	Team Leader	Work closely with business partners, project managers, third-party vendors, and developers to review business requirements. Provide work estimates based on business requirements analysis. Partner with project management to establish deadlines for completion of projects. Provide formal project communication to management. Work with a team of developers to implement projects. Provide technical guidance and direction to developers. Ensure the architectural review of a technical or business solution is performed and documented according to Enterprise-Wide Technical Architect standards, provide estimates of time, resources and costs. Establishes scope, identifies team, initiates change control as project progresses. Addresses issues and mitigates risks, communicates status to business sponsor, IT management, and other projects that are impacted by the project. Relies on experience and judgment to plan and accomplish goals. Collects, reviews, analyzes, evaluates and prioritizes business system and user requirements from business, and works with technical lead and developers on translating requirements to system impacts at low level.	MS Or BS	6	\$97.99

11	UnixSysA	Unix System Administrator	Resolve problems in production and disaster recovery environments. Run database queries assigned and routes results as requested. Work with Security group to apply necessary controls to insure safety of data and procedures for databases. Install upgrades to database management software and new vendor releases. Suggest tuning options to help improve database performance. Managing clustered database environments. Monitoring database activity, make optimization recommendations and then execute those recommendations, as needed, including security, configurations, performance and capacity, backup and recovery functions. Working mostly with Sybase, Oracle or SQL 2000 databases.	MS Or BS	5	\$99.00
12	WebAppID	Web Application Developer	Communicate with technical and non-technical audiences, design multi-tier/multi-layer applications using methodologies such as UML and object-oriented concepts, develop high-end VB.Net and ASP.Net web applications to the specifications of the design team including desktop applications, web sites, web applications, xml web services, etc, participate in SDLC in regards to planning, estimating of projects including requirements gathering, high-level design, work estimates and testing, mentor junior development staff, perform code-reviews and enforce code & development standards, work with business analysis team to understand requirements and be able to clearly communicate those requirements to other developers.	BS or Equivalent	2	\$54.00
13	WebDev	Web Developer	Microsoft T-SQL and Oracle PL/SQL Query Languages (creating/modifying complex stored procedures, packages, and views), MS SQL 2K & Oracle8i relational database management (configuration, maintenance, and performance tuning). Provide sophisticated web development using ASP, .NET, VBScript, JavaScript, XML, Visual Interdev, and Visual Source Safe. IIS 5 & 6 configuration, troubleshooting, & administration (including security issues). Monitor and maintain 98% up-time of the Web & Database systems. SQL Server 2000 configuration & administration, and Oracle 8i / 9i Database Administration. Develop, maintain, enhance, and troubleshoot complex MS T-SQL and Oracle PL/SQL queries. Troubleshoot problems related to the Performance Tuning of Stored Procedures, Tables, and Indexes/keys. experience in: web services, SOAP, SharePoint WebParts.	MS Or BS	4	\$85.00
