Magal Senstar	M0KT0211	Transponder with 16 programmable inputs and 8 programmable form C relay outputs. Connects to Network Controller via redundant RS-485 multi-drop data lines. Accepts 12 VDC or 16 VAC power input, an optional battery is charged for UPS operation if 16 VAC used. Separate tamper input. Circuit card assembly can be mounted indoors using one of the enclosure options. Note: Includes installation labour into a selected enclosure.	\$304.62	\$2,767.23	33.00%	\$1,854.04
Magal Senstar	M0KT0212	Transponder with 16 programmable inputs. Connects to Network Controller via redundant RS-485 multi-drop data lines. Accepts 12 VDC or 16 VAC power input, an optional battery is charged for UPS operation if 16 VAC used. Separate tamper input. Circuit card assembly can be mounted indoors using one of the enclosure options. Note: Includes installation labour into a selected enclosure.	\$274.12	\$2,490.15	33.00%	\$1,668.40

Magal Senstar	M0KT1000	Mounting plate, for use in installing in OEM enclosures. Suitable for mounting a transponder or a network controller or 2 repeaters. Plate includes provision for AC Supply (M0KT0100), battery shelf and terminal strip for power connections.	\$90.17	\$819.10	33.00%	\$548.80
Magal Senstar	M0KT1100	Fiber Optic Interface Module circuit card assembly that plugs on to the Sennet Network Controller (NC) or Transponder Unit (TU). When the Fiber Option is used, the copper connections are disabled so the entire Sennet Network must be fiber based. For ring topologies only, use with ST style connectors. The ST port will accommodate type 62.5/125, or 100/140 and or type 50/125 µm multimode fibers, 820 nm wavelength. Quantity two (2) fibers required for each of X or Y.	\$160.89	\$1,461.55	33.00%	\$979.24
Magal Senstar	M0KT1201	Two (2) port Repeater extends copper twisted pair network beyond 1.2 km. (3/4 mile) or 27 devices. One repeater supports a single RS485 data line. Accepts 12 VDC input or 16 VAC power input (an optional battery is charged for UPS operation if 16 VAC used). Circuit card assembly can be mounted on standoffs in any enclosure. Two repeaters can be fitted in one enclosure. This is a new repeater design which does not require additional control lines. Two (2) are needed for both X and Y. Includes wiring harness.	\$131.53	\$1,194.88	33.00%	\$800.57

Magal Senstar	M0KT1203	Two (2) port Fiber Optic Repeater can be used as a copper two (2) port repeater and /or copper fiber optic translator. Repeater extends fiber strands links up to 2 km. (1 1/4 mile) or 27 devices and implements a ring topologies. One repeater supports a single RS485 data line. Accepts 12 VDC input or 16 VAC power input (an optional battery is charged for UPS operation if 16 VAC used). Circuit card assembly can be mounted on standoffs in any enclosure option. Two repeaters can be fitted in one enclosure. This is a new repeater design which does not require additional control lines. Two (2) are needed for both X and Y. ST type fiber optic connectors accommodate 50/125, 62.5/125 & 100/140 um multimode fiber, 820 nm. Includes wiring harness.	\$162.99	\$1,480.59	33.00%	\$992.00
Magal Senstar	M0KT1204	This kit consisting of a pair of two-port fiber optic repeaters (with special routing f/w) is used in a Sennet fiber optic ring configuration to provide an X & Y side RS-485 copper wire tap for Sennet compatible devices which don't have fiber optic versions (i.e. Perimitrax Sensor Module, LTU or RCDP). Accepts 12 VDC or 16 VAC power input (an optional battery is charged for UPS operation if 16 VAC is used). Circuit card assemblies are mountable on provided standoffs in any enclosure option. ST type fiber optic connectors accommodate 50/125, 62.5/125 & 100/140 um multimode fiber, 820 nm. Includes wiring harness.	\$258.49	\$2,348.16	33.00%	\$1,573.26

**SUBCONTRACTOR UTILIZATION:**

ADT is often called upon for turn key Security Systems and Solutions. This may include additional work that is outside of ADT's expertise but integral to the overall solution. Examples of this include but are not limited to the following:

- Providing a Split Air Conditioning system to keep equipment running at proper operating temperature.
- Moving non structural walls or doors to allow an area for equipment and the customer's surveillance operator to reside or to install
- Hiring a locksmith to install door strikes for the card access system.
- Providing concrete pads for mounting camera poles.
- Provide proper lighting for cameras to operate.
- Hiring a fence contractor to repair a damaged fence so that equipment can be installed properly.
- Hiring a fiber contractor to reduce the amount of cable that needs to be ran throughout the building.
- Engage manufacturer technicians to provide a higher level of maintenance to specific installed equipment.
- Trenching to run cable from building to building may include repairing pavement or concrete.
- Hiring a tree contractor to trim or remove trees to allow for optimum required camera views.
- Running conduit and power for cabling in the structure.

Name of Company	Scope of Work	Area served	Regions
-----------------	---------------	-------------	---------

Under the aforementioned circumstances, ADT is permitted under Group PT63073 to undertake the following procedures to ensure both a competitive procurement, lowest cost, and the best services for authorized users to complete a turnkey security system.

Whenever a sub contractor is used ADT solicits three bids for all jobs anticipated to be over \$15,000 in cost.

ADT's list of sub contractors will include their years in business, basic description of work provided and the regions that they conduct their work. As with the past contract and consistent with all other contracts that ADT has with NYS the fee for these services will be cost plus 25%. This includes direct expenses to develop and manage project/contractor milestones, progress billing and field verification of labor quality. It also includes the following:

ADT takes full ownership of the project from cradle to grave insuring that the end user gets the best integration possible. This also allows the NYS customer a single point of contact instead of being tasked with managing multiple trades at one time.

ADT works with the NYS customer and usually their consultant to review all the Plans and Specifications.

ADT will work with the Engineers and Consultants to clarify any issues with the Plans and Specifications.

ADT will then bid the project to three reputable contractors. This usually includes a pre bid meeting and a walkthrough of the facility.

ADT then reviews all Contractor bids and will oversee the selection of a qualified and competent contractor.

ADT will arrange and attend a kick off meeting with their contractor and the facility.

ADT will oversee that all the specific standards and requirements of the State Customer are followed.

ADT will oversee ALL aspects of the project.

ADT will work to ensure at project completion that the contractor's punch list is not dragged out, that the facility can assume normal operations without the on going, never ending punch list work.

ADT will demonstrate the cost of these services by submitting the original subcontractors' quote to the authorized user for review prior to the commencement of work. In addition, ADT will attach a copy of the subcontractors' invoice, with our fee clearly noted, when applying for payment.

**SERVICE**

In the event that a NYS Customer does not have a full maintenance plan in effect and requires Time and Material Service the following rates shall apply.

All LABOR shall be charged as per the Regional rates posted on the current contract.

All REPLACEMENT of "ON CONTRACT PARTS" shall be charged as per the current NYS Contract posted rate.

In the event that an ADT technician determines that a piece of equipment can not be field repaired it will be necessary to return such piece of equipment to the manufacturer for evaluation. If the manufacturer can repair the piece of equipment or any component of such equipment an estimate will be provided to ADT by the Manufacturer. ADT will then determine the cost of the repair, which is not to exceed 50% of the replacement cost. If the repair cost exceeds 50% of the replacement cost, ADT will recommend replacement. If the piece of equipment or any component can be repaired by the manufacturer for less than 50% of the replacement value, ADT shall authorize such repair via a Purchase Order to the Manufacturer. The final repair cost will be the net cost of the repair, which includes all shipping and handling charges, plus an additional fee of 25% of the manufacturers repair cost. Any field repair charges incurred will be billed at the hourly labor rates posted on our current contract. Upon request, ADT will furnish the Purchase Order provided to the manufacturer as verification of the repair charge.

In the event that ADT chooses to use manufacturer's representative, field advisor, or sub contractor to perform a service call or site visit, the cost shall be the same as our sub contractor provision which is cost plus a 25% markup.
