The raw material supplier for this item will be Fechheimer-Flying Cross, Cincinnati, Ohio. It is anticipated that this commodity will provide jobs for 1 or 2 individuals with disabilities.

892_EEP-110-W40-R – EEP-110-C34-4 / Replacement LED Bulbs

LED replacement light bulbs are simple replacements for standard incandescent bulbs. The 110 volt bulbs have an average life span of 50,000 hours or about 25 years, and the 12 volt bulbs also have a 25 year estimated life span. They use the same standard sockets and typically pay for themselves within 2 years. LED bulbs operate at a much cooler temperature, so can decrease air conditioning costs in areas with many bulbs in use. These bulbs are on average 10 times more energy efficient than incandescent and twice as efficient as fluorescent bulbs. They can also reduce maintenance expenses, with reduced or eliminated need for servicing and replacement over years at a time. The bulbs are sourced from a NYS based company- EEP - headquartered in Oriskany, NY with distribution out of Rome, NY. The first few years of sales are anticipated to be modest, as tiered restrictions will become effective over time, guiding end users toward this kind of replacement bulb slowly. We expect first year sales to reach around \$50K. 100% of the direct labor being performed at Central Association of the Blind and Visually Impaired (CABVI) in Utica will be performed by employees who are blind. Additionally, the team leader supervising this project is legally blind. Direct labor will primarily be repackaging, but we expect that the future growth potential will impact employment increases for warehousing personnel as well.

893_D4745 / 4-Cabinet LED Billboard

Full color, video-capable, high resolution outdoor LED digital Signage display (“Electronic Message Boards”). Cloud based content management software, allowing secure access with any computer that has internet access.
