

HOW TO USE ADT SECURITY SERVICES, INC.'S SUBCONTRACTORS:

ADT is often called upon for turn key Security Systems & Solutions. This may include additional work that is outside of ADT's expertise but integral to the overall solution. Examples of this include but are not limited to the following:

- Providing a Split Air Conditioning system to keep equipment running at proper operating temperature.
- Moving non structural walls or doors to allow an area for equipment and the customer's surveillance operator to reside or to install a portal door or sally port.
- Hiring a locksmith to install door strikes for the card access system.
- Providing concrete pads for mounting camera poles.
- Provide proper lighting for Cameras to operate.
- Hiring a fence contractor to repair a damaged fence so that equipment can be installed properly.
- Hiring a fiber contractor to reduce the amount of cable that needs to be ran throughout the building.
- Engage Manufacturer technicians to provide a higher level of maintenance required for specific installed equipment.
- Trenching to run cable from building to building may include repairing pavement or concrete.
- Hiring a tree contractor to trim or remove trees to allow for optimum required camera views.
- Running of conduit and power for cabling and devices in the structure.

Under the aforementioned circumstances, ADT is permitted under Group PT63073 to undertake the following procedures to ensure both a competitive procurement, lowest cost, and the best services for authorized users to complete a turn key security system:

Whenever a sub contractor is used ADT solicits three bids for all jobs anticipated to be over \$15,000 in cost. ADT's list of sub contractors will include their years in business, basic description of work provided and the regions that they conduct their work. As with the past contract and consistent with all other contracts that ADT has with NYS the fee for these services will be cost plus 25%. This includes direct expenses to develop and manage project/contractor milestones, progress billing and field verification of labor quality. It also includes the following::

1. ADT takes full ownership of the project from cradle to grave insuring that the end user gets the best integration possible. This also allows the NYS customer a single point of contact instead of being tasked with managing multiple trades at one time.
2. ADT works with the NYS customer and usually their consultant to review all the Plans and Specifications.
3. ADT will work with the Engineers and Consultants to clarify any issues with the Plans and Specifications.
4. ADT will then bid the project to three reputable contractors. This usually includes a pre bid meeting and a walkthrough of the facility.
5. ADT then reviews all Contractor bids and will oversee the selection of a qualified and competent contractor.
6. ADT will arrange and attend a kick off meeting with their contractor and the facility.
7. ADT will oversee that all the specific standards and requirements of the State Customer are followed.
8. ADT will oversee ALL aspects of the project.
9. ADT will work to ensure at project completion that the contractors punch list is not dragged out, that the facility can assume normal operations without the on going, never ending punch list work.

SERVICE

In the event that a NYS Customer does not have a full maintenance plan in effect and requires Time and Material Service the following rates shall apply.

1. All LABOR shall be charged as per the Regional rates posted on the current contract.
2. All REPLACEMENT of "ON CONTRACT PARTS" shall be charged as per the current NYS Contract posted rate.
3. In the event that an ADT technician determines that a piece of equipment can not be field repaired it will be

necessary to return such piece of equipment to the manufacturer for evaluation. If the manufacturer can repair the piece of equipment or any component of such equipment an estimate will be provided to ADT by the Manufacturer. ADT will then determine the cost of the repair, which is not to exceed 50% of the replacement cost. If the repair cost exceeds 50% of the replacement cost, ADT will recommend replacement. If the piece of equipment or any component can be repaired by the manufacturer for less than 50% of the replacement value, ADT shall authorize such repair via a Purchase Order to the Manufacturer. The final repair cost will be the net cost of the repair, which includes all shipping and handling charges, plus an additional fee of 25% of the manufacturers repair cost. Any field repair charges incurred will be billed at the hourly labor rates posted on our current contract. Upon request, ADT will furnish the Purchase Order provided to the manufacturer as verification of the repair charge.

4. In the event that ADT chooses to use manufacturer's representative, field advisor, or sub contractor to perform a service call or site visit, the cost shall be the same as our sub contractor provision which is cost plus a 25% markup.

ADT SECURITY SERVICES, INC. LIST OF SUBCONTRACTORS:

Name of Company	Scope of Work	Regions
TKM 50 Carnation Avenue Building 4 Floral Park, NY 11001	Installation of Fiber, security, fire alarm, voice/data	1, 2, 3, 4
