Xybix ErgoPower® Dispatch Consoles

Xybix ErgoPower® dispatch consoles lead the industry in ergonomic performance. ErgoPower tables' height range of 22 to 48 inches meets the current *ANSI/HFES 100-2007* ergonomic standards ensuring your people are comfortable, productive and healthy.

Ease of use is unparalleled, simple controls can be effectively used without training. ErgoPower tables are the most stable on the market. Designed for 24/7 multiple monitor applications, large profile legs and heavy duty design contribute to both strength and durability.

A complete package for the communication center includes equipment storage cabinets, personal storage, cable organization and management, task lighting, personal environmental controls and multiple monitor organizational mountings.

Xybix ErgoPower tables are the only tables that can be used with I-Fit® Ergonomic positioning software. Memorized positions roam with each user to any console. Reporting presents statistical usage information for any or all users. Finally, tables that can ensure correct positioning along with record keeping abilities can greatly enhance proactive ergonomic programs.

Task Lighting

Xybix offers many options for energy saving LED task lighting:

- **The Lux Light (LED)** – Two tasklights on front worksurface. Stylish nickle plated finish, multi-directional flex, can be dimmed with the use of the MyClimate controller. Cool to touch.
- **The Z-Bar (LED)** – This desk lamp is compact and space saving, it is a great for illuminating a keyboard or reference materials. It provides over 50,000 hours of illumination and has four brightness settings.
- **Bias Lighting** – attached to Rollervision® this indirect lighting source helps make computer viewing more comfortable by reducing eye strain. By reducing fatigue this type of lighting creates an easy transition for the eyes from the darkness of the room to the brightness of your computer monitors. Bias lighting can be easily dimmed or brightened with the use of MyClimate.

Environmental Notes from Xybix

Xybix understands that consumers are turning increasingly towards healthy and environmentally friendly products. Xybix is proud to announce that all of its products are UL Greenguard Indoor Air Quality Certified®. This certification gives credence to manufacturers' sustainability claims, backing them with empirical scientific data from an unbiased, third-party organization.

Our furnishings and finishes have been rigorously tested for emissions of formaldehyde, volatile organic compounds, aldehydes, respirable particles, ozone and other pollutants and are within the allowable emission levels standards. Unlike other similar furniture manufacturers, this test is conducted on the complete Xybix product as it will be installed and used at the customer's facility.

Xybix's height adjustable workstations are certified according to the UL GreenGuard® Indoor Air Quality Certification Program for Low Emitting Products. Each of our laminate suppliers have UL GreenGuard® certifications. Xybix's panel fabric suppliers provide innovative earth-friendly products that have earned a Reduced Environmental Impact designation because they are produced of the following fibers or materials:

- 100% recycled fiber, or
- 100% bio-based fiber, or
- 100% heavy metal free fiber, or
- 100% natural, compostable fiber, or
- PVC free

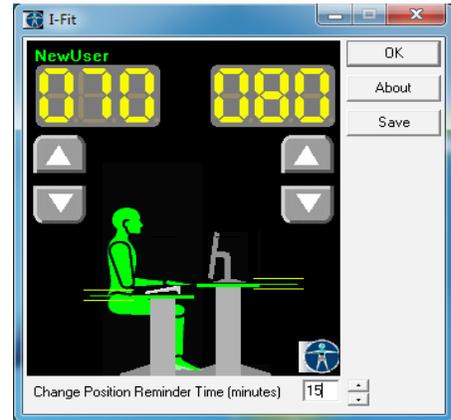

I-Fit - Ergonomic Software
