Wireless Synchronized Time
Digital & Analog Clocks

Emergency Mass Notification (EMN)

2.1

OSHPD Seismic Compliant
Anchorage in California

The SyncTech® Wireless Synchronized Clock System uses a single master clock, equipped with either an NTP, GPS or CDMA receiver. The system obtains and transmits the correct US Time Standard to an unlimited number of secondary clocks, throughout a facility or an entire campus. This system eliminates potential liabilities from inaccurate, independently set clocks and eliminates manual standard to daylight time changes. Emergency Mass Notification options may be added to these Master Clocks to instantly notify the occupants of an entire facility. (See page 80 or peterpepper.com links below.)

The SyncTech® Emergency Mass Notification (EMN) will instantly send text and/or audio messages throughout a facility or across an entire campus in a matter of seconds, and not minutes.

Now the same emergency messages through the University's emergency dialing software can also be delivered to your entire facility utilizing the SyncTech® Wireless Emergency Mass Notification (EMN) System. Using the latest text-to-speech technology from AT&T, the SyncTech® system will send out alpha-numeric messages to all Wireless Message Displays, Wireless Speakers and Outdoor Broadcast Systems. To reduce costs, our system can be integrated into most PA and Fire Panel systems and utilize existing speakers, or combinations of both.

How does it work? SyncTech® EMN Software ties into the URL that broadcasts the RSS feed supplied by the paging software. When an alert is sent from the paging software, the SyncTech® EMN Software automatically sends out an audio alert to all SyncTech® speakers and a text alert to all SyncTech® message displays.

When an "all clear" is sent from the paging software, the SyncTech® EMN Software automatically changes the message displays back to time.

See www.peterpepper.com/emn/ for additional information and products.

Benefits of Wireless Emergency Notification

- Uses a FCC Licensed frequency not accessible to the general public.
- Audio and Visual notifications in the event of an emergency.
- NFPA 72 recommended Amber strobe lights on indoor speakers and moving message boards.
- Over 60 professionally recorded emergency announcements to choose from.
- Easily integrates into more fire control panels to utilize system speakers.
- Up to 15 pre-recorded emergency messages that provide calm, concise announcements.
- Make live emergency announcements from any telephone, cell phone or SyncTech® master control PC.
- Text to speech technology using AT&T Natural Voices Software.
- Ability to have back up master transmitter in the event of a catastrophic failure at the primary location.
- Plus and Play components for easy installation and expansion.
- Ability to divide facility or campus into 255 separate zones.
- Synchronized time for your entire facility or campus.

Installation: Quick. Easy. Efficient.

To install Evolution, simply anchor the steel hanger rail to wall studs, hang the frame on the rail and snap in tiles. One simple tool provided with each order is all you need to remove tiles. A universal bracket accommodates soap dispensers, sharps containers and other accessories. To remove or change a tile or accessory, insert the provided removal tool slightly behind the tile/accessory and pull to pop it out. Complete installation details are available at www.peterpepper.com.

If needed, power and data can be easily routed through the space behind the frame, keeping cords neatly hidden. A licensed electrician is required to connect unit power to building power.

Step 1. Determine Frame Size

Frames hold a variety of interchangeable tiles for creating customized wall arrangements for storage, charting, dispensing, power and technology components.

Attachment: Hanger rail (included) attaches to studs in the wall. Frame hangs from the rail. Frame also attaches at the bottom into the wall studs.

Construction: Steel hanger rail and frame 14ga. Trim 18ga.

Finishes: Trim is Taupe or Aluminum Metallic powder coat paint. Frame is Black powder coat paint.
