1. **Maintenance and Support Program Descriptions:**

   Hardware Gold Program:

   On-Site Routine Maintenance Services include, among other things, cleaning, lubrication and calibration services on a once annual basis.

   On-Site Remedial Maintenance Services: If a defect or malfunction occurs in any Product while it is under normal use and service, ES&S shall use reasonable efforts to restore the Product to Normal Working Condition as soon as practicable. ES&S will repair or replace any component of our proprietary equipment or software which, while under normal use and service, (a) fails to perform in accordance with its documentation in all material respects, or (b) is defective in material or workmanship.

   Hardware Silver Program:

(Continued)

Same services as the Hardware Gold Program except On-Site Routine Maintenance Services are performed once during a twenty-four (24) month period.

Hardware Bronze Program:

ES&S will repair or replace any component of our proprietary equipment or software which, while under normal use and service, (a) fails to perform in accordance with its documentation in all material respects, or (b) is defective in material or workmanship. The principle elements of this program are:

    a. Equipment requiring repairs must be sent to a location designated by ES&S.
    b. Customer is responsible for freight to and from the designated ES&S repair location.
    c. Repairs as a result of negligent care of the equipment are not covered under this program.
    d. Routine Maintenance Services for Product(s) covered under a Bronze Program shall only be provided in the event such Product(s) are sent to an ES&S depot location for repair.

Firmware Maintenance and Support:

ES&S shall provide maintenance and support services for the ES&S Firmware to enable it to perform in accordance with its documentation in all material respects, and to cure any defect in material or workmanship. During the Firmware Maintenance and Support Term, ES&S shall provide updates in accordance with an update schedule determined by ES&S.

Software Maintenance and Support:

ES&S shall provide maintenance and support services for the Software (a) to enable the Software to perform in all material respects in accordance with its documentation, as provided by ES&S, and (b) to cure any defect in material or workmanship. During the Software Maintenance and Support Term, ES&S may provide new releases, upgrades or maintenance patches to the Software, along with appropriate documentation ("Updates"), on a schedule defined by ES&S. Customer is responsible for obtaining and installing any upgrades or purchases of third party hardware or software required to operate the Updates. Customer shall install Updates in accordance with ES&S' recommended instructions or may request that ES&S install the Updates. ES&S will charge Customer separately to (a) deliver the Updates, (b) train customer on the use of such Updates, and (c) provide maintenance and support on the Software which is required as a result of Customer's failure to timely install an Update. Customer shall pay ES&S for any Update which is required due to a change in state law.

ES&S Warranty Programs:

*LEGACY MAINTENANCE PLAN PURCHASED FOR VOTING SYSTEMS PURCHASED FROM AWARD 21231 EQUIPMENT:

The Authorized Users of the legacy voting systems will need to be able to maintain the systems and that for the extended maintenance or other maintenance to be done, contractors may charge to get the legacy voting systems up to the most current certification. Pursuant to Contract Award 21231, contractors were required to provide a Project Warranty Period which warranted the voting systems set forth below for five years from the date of acceptance of the voting system by an authorized user. This warranty covered, among other things, modifications required by New York State law or regulation. After the expiration of the Project Warranty Period required by the contract, authorized users had the option to purchase Extended Maintenance Plans and enter into an Extended Warranty Period. Some Authorized Users may not have purchased those plans, however. Therefore, in cases where an Authorized User now wishes to purchase an Extended Maintenance Plan for voting systems purchased under a contract awarded pursuant to Contract Award 21231, Contractors may charge for any parts and labor costs necessary to bring the County's voting system back to the most current certified version, as determined by the SBOE, as a result of any damage or defects which occurred or arose after the end of the Project Warranty Period for the voting system. Contractors shall not charge for any other parts or labor costs as those costs were covered by the Project Warranty Period. Prior to the commencement of any work, the Contractor shall submit a written proposal for any such charges to the Authorized User and must receive written acceptance of such proposal from the Authorized User prior to beginning any work or commencing any extended maintenance plan.
