CONTRACT AWARD PRICE LIST
#4 of 6

Title	: Group 38614 - Traffic Safety Equipment - Highway Roadway Safety Barriers (Crash Cushions, Truck Mounted Attenuators: Systems, Parts & Accessories) Classification Code(s): 25, 30, 46 & 92 (Statewide)
Award Number	: 21253
Contractor	: Traffix Devices, Inc.
Contract #	: PC64076
Toll Free Order #	: (877) 930-5663

Price List #2 – Updated October, 2012

Description

Traffic Safety Equipment includes crash cushions and a variety of barricades, which are precautionary barriers which passively assist in channeling traffic, while also preventing vehicles from impacting major structures such as bridge supports and lighting and utility equipment. Also included are attenuators which serve to protect the rear of large slow moving service vehicles and trailers or stationary structures in the event of a collision, while also absorbing and dispersing the force of the impact so as to concentrate the accident zone and minimize the effect on additional lanes of traffic. Additionally, they are used to assist and protect our road crews in construction and service zones and are important tools for ensuring safe travel on roads and highways throughout the State of New York.

Lead Contract Administrator: Julie Edwards , Contract Specialist

TraFFix Sentry™

Water-Cable Barrier Wall

**TraFFix
Devices Inc.**

**Three (3) Longitudinal Saw Tooth
Anti-Vehicle Climbing Ribs**

FEATURES

- The Sentry Water-Cable Barrier Wall has been tested and accepted for all TL-2 & TL-3 light weight 1,807 lbs (820 kg) and heavy 4,409 lbs (2,000 kg) vehicle impacts at 45 mph (70 kph) and 62.5 mph (100 kph) impacts
- Sentry Water-Cable Barrier weighs 160 lbs (73 kg) empty and 2,000 lbs (907 kg) completely full with 220 gal (832 l) of water.
- Sentry is 72 in (183 cm) long, 43 in (109 cm) tall and 22 in (57 cm) wide
- Four integrally molded corrosion resistant steel cables prevent the impacting vehicle from breaching the Sentry Water-Cable Barrier.
- The integrally molded steel cable and bushings allow for the creation of a free standing, continuous longitudinal water-cable barrier.
- Stacking lugs on the top and bottom of the Sentry make storage and transport a breeze.
- Fork lift through holes and pallet jack slots make movement and placement of Sentry quick and easy.
- Interlocking knuckle design allows for positive connection between Sentry barriers while still maintaining up to a 15 degree rotation between sections.
- 8 in (20.32 cm) diameter fill hole allows for quick filling
- Tamper resistant drain plug with course but-tress thread screws in or out in only 1.5 turns
- Sentry's interlocking knuckles on each end positively link sections together with a galvanized steel T-pin.

**Stacking Lugs
(2) per section**

**Cutaway Showing Four
Integrally Molded Cables
& Bushings**

**Pinned Walls
Rotated at 15°**

8" diameter Water Fill Hole

**1-1/2 Turn, Quick Out Drain
Plug w/But-tress Thread**

**4,409 lbs (2,000 kg) at 25° Impact Angle and 45 mph (70 kph)
Deflections - TL2 45 mph (70 km/h) - only 5.9 feet (1.80 m)
TL3 62.5 mph (100 km/h) - only 9 feet (2.74 m)**

SLED™
Sentry Longitudinal Energy Dissipater

SLED™ TL-3 in use on a Missouri Highway

SLED™ TL-2 in Illinois

SLED™ TL-3 in Downtown Cincinnati, Ohio

- FHWA Accepted for Shielding the Blunt End of Concrete, Steel and Water Filled Barriers
- Quick and Easy Set-Up, No Foundation Anchoring, Minimized Installation Exposure Time
- Cost Effective End Treatment for Concrete, Steel or Water Filled Barriers
- Universal Transition Quickly and Easily Attaches to a Variety of Barrier Shapes and Sizes
- *SLED's* Stout Design Virtually Eliminates Vaulting
- Narrow Footprint is Ideal for Work Zones or Roads with Minimal Shoulder Spacing
- Shortest Length TL-3 Water Filled Crash Cushion, Fewer Incidental Impacts
- Containment Impact *SLED* Minimizes Debris Field
- Visual "Drive By" Fill Indicators Quickly Verify Water Module's are Properly Filled
- FHWA Accepted for Use in Uni- and Bi- Directional Applications
- Internal Steel Cables Help Envelop Vehicle After an Impact, Creating a Truly "Limited Gating" System

PRODUCT BULLETIN

SLED™

Sentry Longitudinal Energy Dissipater

Inline TL-3 Truck Test Pre Impact

Inline TL-3 Truck Test Post Impact

SLED™ Sentry Longitudinal Energy Dissipater

The Sentry Longitudinal Energy Dissipater (SLED) is a narrow, non-redirective gating crash cushion. SLED is designed to shield the end of all permanent and temporary portable barrier shapes including concrete, steel and plastic. SLED's unique design incorporates four internal steel cables which help envelop the impacting vehicle, reducing the possibility of secondary accidents. The SLED End Treatment does not require foundation anchor bolts to be attached to the road or bridge deck. The complete crash cushion can be installed quickly, with as little as one pick up truck and two workers on compacted dirt, gravel, decomposed granite, asphalt or concrete.

Each SLED module is manufactured from a high visibility yellow polyethylene that is UV stabilized to minimize degradation. It is designed to deform and rupture on impact, absorbing the energy of the errant vehicle. SLED has the most versatile transition for shielding all permanent and temporary portable barriers. The combination of hinging and contouring, allows the transition panels of the SLED End Treatment to be attached to narrow, wide or other profile shapes with either converging, or diverging angles, up to 10 degrees.

SLED™ TL-3 4500 lb. Pick-Up Truck Impact Attached to Concrete Median Barrier Wall

TURBOFLARE AA

Electronic Emergency Flares

- 360 degree rotation, 20 ultra bright LED's
- Uses 4 AA Alkaline Batteries
- Tough Dupont Surlyn Case
- Weatherproof, shockproof, vibration proof
- Spring-loaded, moisture resistant ON/OFF
- Safer than flammable incendiary flares
- Resists fuels, salts, chlorine
- Lead free and better for the environment
- Compact and easily stored

TurboFlare™ is a patented electronic device that directly replaces the dangerous incendiary road flare.

This revolutionary product is a true technological advancement in safety equipment.

Used by police, fire, rescue, military, mining, helicopter emergency landing zones, building evacuation, refineries, hazardous response teams, DOT, public utilities, public transportation and many more.

TurboFlare™ is rugged, reliable and very economical.

TRAFFIX ALERT™
Rumble Strip
*Alerting Drivers with Sight, Sound and
Sensation Awareness*

Jigsaw connection for secure and simple deployment

Three color choices to enhance driver visibility

Dimension and placement maximize driver awareness

Temporary Rumble Strip

Quickly and easily deployed or retrieved, used to alert approaching motorists to an upcoming change to the roadway.

Application

Three 46.5" long x 12" wide rumble strips fit easily together to form a 12' lane width. Three of these 12' long assemblies are spaced evenly on roadway to alert drivers to the upcoming work zone or safety checkpoint. Full 1" thickness x 12" width delivers better sensory awareness to the motorist.

Ease of Assembly

Assembles quickly with one person. Pliable rubber with jigsaw connection provides easy connection of strips. Can be assembled in-line or staggered for additional driver awareness. Bidirectional ramp eliminates orientation of the strip on the roadway.

Ease of Handling

Large handle accommodates a gloved hand for a balanced carry and drop. Jigsaw ends double as handles for easy positioning and dragging. One complete set of 3 sticks weighs only 72 lbs.

Disassembly and Transporting

Simply grab the end nearest the shoulder and drag off the road. Easily stack on the truck with the molded-in stacking lugs which stabilize the TraFFix Alert Rumble Strips during transport.

Color

The TraFFix Alert Rumble Strip comes in Black, Orange or White. The Orange or White strips can be mixed in with the Black strips to enhance long site distance visibility to the motorist. Custom colors also available.

Made of Recycled Rubber

Adheres to the roadway at all times, in all conditions and at all speeds. Made from durable, recycled rubber and designed to take heavy highway use. High tech grooves and rubber construction provides grip and adheres to the roadway.

PRODUCT BULLETIN

Scorpion® Truck Mounted Attenuator

Fast-Trak SwiftConnect™

- Quickly and securely connect the Scorpion® Truck Mounted Attenuator to any heavy-duty vehicle with the Fast-Trak SwiftConnect™
- Eliminate use of a single dedicated host vehicle with the Fast-Trak SwiftConnect™ for the Scorpion® Truck Mounted Attenuator
- Connection/Disconnection is the fastest in the industry
- Fast-Trak SwiftConnect™ allows the Scorpion® TMA to connect in as little as a minute
 1. Back up truck to Fast-Trak SwiftConnect™
 2. Align mounting hooks over connection bars
 3. Lower into place
 4. Plug in electrical
 5. Insert lock pins
- Easy to install on multiple vehicles in your fleet

Barricade and Vertical Panel Stripe Diagrams

Left Hand Stripe
270 Square Inch Trapezoid-Left Stripe

Right Hand Stripe
270 Square Inch Trapezoid-Right Stripe

All vertical panel barricades with reflective sheeting on **ONE** side will have right hand stripes and will be denoted with an R at the end of the part number. For left hand vertical panel stripes, replace the R in the part number with an L (unless otherwise specified).

Left Hand Stripe

Right Hand Stripe

All vertical panel barricades with reflective sheeting on **ONE** side will have right hand stripes and will be denoted with an R at the end of the part number. For left hand vertical panel stripes, replace the R in the part number with an L (unless otherwise specified).

All vertical panel barricades with reflective sheeting on **TWO** sides will have one right hand and one left hand panel stripe (unless otherwise specified).

Left Hand Rail

Right Hand Rail

All horizontal panel barricades with reflective sheeting on **ONE** side will have right hand stripes and will be denoted with an R at the end of the part number. For left hand vertical panel stripes, replace the R in the part number with an L (unless otherwise specified).

All horizontal panel barricades with reflective sheeting on **TWO** sides will have one right hand and one left hand panel stripe (unless otherwise specified).

Rollup Sign Program

Standard Sign Legends and Overlays:

Sign legends and overlays listed on the Traffix Standard Sign Legend list will be considered a standard legend or overlay, with no additional Set Up charges added to the order.

Sign Sizes: 36"x36" or 48"x48" Diamond Shaped, Black on Orange
Materials: Non-Reflective Mesh & Vinyl, Standard Reflective Vinyl,
Reflexite Marathon & 3M Diamond Grade

Non-Standard Sign Legends and Overlays:

36" x 36" and 48" x 48" Sign legends, or overlays, not on the Traffix Standard Sign Legend list will be considered non-standard. A Set Up charge will be added to the order for each non standard sign or overlay legend, per order.

Set Up Charge:

Sign: \$50.00 per sign legend, per order

Overlay: \$25.00 per overlay legend, per order

Custom Sizes, Shapes, Colors & Materials:

For sign sizes, shapes, colors and materials other than 36" x 36" and 48" x 48" diamond shaped, black on orange; please Call Customer Service at (949) 361-5663 for Assistance and Quotation Request.

Lead Time:

Lead Time is measured as PRODUCTION TIME to SHIPPING DATE from Traffix Devices. It does not include artwork creation time, or artwork approval time, or transportation time, unless noted.
